

YEAR ONE

AUTONOMOUS SIGNATORY COMMITMENT CEREMONY DOCUMENT
CC BY-NC-ND / 2022 CE / YEAR: ONE
DEVELOPER: ELÆ MOSS

NAME / COLLECTIVE ENTITY:

DATE (in CE):

LOCATION / SITE*:

**for SITE consider including standardized mapping / location name for your CE year, geographic coordinate locators (longitude / latitude), and the unceded territory language of the land's original stewards*

WITNESS(ES)*: (optional)

**if and when a signatory feels called to do so, one can include signatures / names of witnesses present for the signing of this document as an additional measure of creating accountability mechanisms for autonomous practice*

ABOUT THIS DOCUMENT: This signatory page is an autonomous agreement made by an individual and/or collective entity to begin the process of enacting a new timeline of stewardship, survival, and sustainable personal and collective practices, beginning now, with YEAR ONE.

This document is ultimately a contract with the self / community: the YEAR ONE project is distributed and nonhierarchical – no one will be monitoring your progress and/or work towards this goal. The *autonomous mechanics* concept that drives this process is based in an understanding that while “we,” those participating in this experiment, may have “shared” goals, that the way we understand what we are doing will necessarily differ, and that the process will be intensely personal in what it requires from each of us in ways others may never see or understand. You may, however, send your document to the developer, to yearone@onlywhatican.net, for collection in a registry of autonomous agents.

Signing this document is a commitment to a way of life and a future that you want for yourself, your community and the planet, regardless of what the systems in power are doing, knowing that waiting for those systems is a losing battle, and that we can begin writing another story.
